ATLANTA'S COMING EXPOSITION.

Notes of the Exposition-More of the Promi nent Men Who Will Attend-Many Exhibits-Women's Press Committee-Some of the Operative Wonders of Electricity. Atlanta, Ga., July 14.-Ex-Governor

W. J. Northen of Georgia, chief of the educational department of the Cotton States and International Exposition, wires from Denver that the National Enducational convention, ten thousand strong, at Denver, has accepted the invitation to be present at the exposition, and open the congress of education, the last week in October. The National Educational association has boxes, comes out. The paper is cut into taken a deep interest in the exposition from the start, and was one of the first bodies to memorialize congress in its behalf. Governor Northen is an educator of life-long experience, and during his two terms of office, did more than any of his predecessors to improve the public school system in the state. He has the hearty support of the department of education at Washington, in his administration of this department of exposition work.

A party of newspaper men and ladies have arranged a house-boat party, to leave New York city on the first of September, for the Cotton States and International Exposition. The route which they take is a good illustration of the facilities for water travel through the union. The boat's dimensions are thirty by twelve feet, and the greater part of this distance will be poled. The route, as outlined, will traverse the Hudson river, from New York to Albany; thence by the Erie canal to Buffalo; thence to Cleveland, along the shore of Lake Erie; thence to Portsmouth, O., by the Ohio canal, where the Ohio river will be taken to the Mississippi, and the latter down to some convenient point, probably Mem-phis. From there, the railroad will be taken to Atlanta, where the party will arrive on the 18th of September, the opening day. The party propose to have a great deal of pleasure along the route, but the exposition will be the objective point.

Hon. Henry G. Kittredge, the secretary of the Massachusetts commission to the Cotton States and International Exposition, has been in Atlanta during the past week, conferring with the exposition management, in reference to the Massachusetts display. He selected a site at Pledmont Park for the Mas-

sachusetts building.
An application has been received at the headquarters of the Cotton States ton States and International exposiand International Exposition from the Central railroad of Georgia, and the Georgia railroad, for a suitable location on which to erect a building to be occupied jointly by these two roads. The Central and the Georgia roads cover the most fertile parts of the state and will make the contractors. state, and will make an exhibit that will fully demonstrate the products of eorgia. They will be awarded a prominent place on the exposition grounds, and the officials of the roads announce that they will erect a very handsome

The exhibit which will be made by the commissioners from the District of Columbia at the Cotton States and International Exposition, will be an exceptionally fine one. It will comprise an exhibit from the public schools of the district, Colonial and Revolution-ary relics, the works of Washington artists, a library and literary exhibit, and an exhibit by the woman's peace congress. The exhibit will be particularly rich in Colonial and Revolutionary relies in which the district abounds, and will be viewed with interest as an exhibit officeries in which the district abounds. terest as an exhibit collected by private effort from the capital of the coun-

The woman's press committee of the Cotton States and International Exposiof which Maude Andrews Ohl of the Atlanta Constitution is chairman, will meet in Atlanta on the 2nd, 3rd and 4th days of October. During their stay they will be guests at the homes of the board of women managers, and will be delightfully entertained.

At a recent meeting of the directors of the Cotton States and International Ex-position, Mr. S. M. Inman, chairman of the finance committee, announced that more bonds were to be placed before the opening of the gates. In about fifteen minutes all of the bonds were placed, and the expenses to the opening of the exposition gates fully covered. This absolutely secures the financial status of the exposition. A significant fact in the placing of the bonds was that they were all taken by the officers of the exposition and members of the board of directors, who are fully cognizant of the progress of the exposition, and its financial standing and outlook.

The State Editorial association of Minnesota will send a committee to Atlanta soon to look into the matter of an excursion to the Cotton States and International Exposition during the fall. The Alabama Editorial associa tion will visit the exposition, on the invitation of the imagement, on the 10th of October. Many other State Editorial associations have accepted the invitation of the exposition management visit Atlanta during October, and it is probable that the associations of a majority of the states will be in Atlanta during that month.

mington, N. C., visited Atlanta during the last week with a view to arranging for a military encampment of the North Carolina volunteer troops during the Cotton States and International Expo-Among the party were the mayor of Wilmington, representative citizens of Wilmington and commanding officers in the North Carolina National Guard and the Naval Reserve of that They visited the grounds and oked into the situation. It is probable that a large encampment of the troops of that state will be arranged for some favorable date during the progress of the exposition.

The state board of commissioners from Illinois will visit Atlanta during the coming week to select a site for the Illinois building and make arrangements for the installation of the exhibit from that state. It will be remembered that Ilinois recently appropriated \$15,000 for a representation of the state at the Cotton States and International Exposition. The state will be given a suitable location for their building and will be tendered every facility for the ar-

rangament of business in Atlanta.

Among the operative exhibits that will be shown in the Machinery hall at the Cotton States and International Exposition is a pin machine. It is in two parts, the first of which makes pins and the second sticks them in paper, This will be done in full view of the visitors. A slender thread of brass wire is started in one end of the machine. It is cut, pointed and the head put on, and the Plano solo-G. P. Havens.

ompleted pin is dropped into a bath which plates it with white metal. From this receptacle the pins are dropped into a sifter, which carries them rapidly to the sticking machine, where they are stuck in regular rows in the paper, and a complete paper of pins is turned out. The mechanism of the machinery is delicately elaborate, and it will be one of the most interesting exhibits in the Machinery hall.

The envelope machine at the Cotton States and International Exposition will be one of the most interesting operative exhibits in Machinery hall. A roll of paper is started in one end of a machine and at the other end the complete envelope, made, gummed and packed in shape and gummed, the envelopes folded, sealed and counted and packed all by machinery. The gum is dried on the envelopes by a series of rapidly revolving fans, so that there is no sticking together. Atlanta, July 8 (Press).-Messrs. J. E.

Graybill, Fred W. Snew, Frank M. Baker and James Swann, the New York commissioners to the Cotton States and International Exposition, visited Atlanta during the past week and selected a site for the New York building. Mr. Graybill, the chairman of the commission, expressed himself delighted with the harmony of the landscape and the architecture, giving the combination of park effect with solid buildings. All of the visitors were much gratified at the progress of the exposition buildings. which are very near completion. The New York commissioners intend to give a large part of their appropriation to an exhibit of colonial relics. It is proposed to devote much of their efforts to induce manufacturers of the state of New York to make large exhibits.

At a recent Fourth of July celebra-tion on Prince Edward Island, Canada, Mr. B. W. Wrenv, the passenger traffic manager of the Plant system of railroads and steamship lines, made a speech about the exposition. Reports from Canada indicate that a great interest is being taken there in the expo-

Among the special excursions coming to Atlanta during the progress of the Cotton States and International exposiion will be that of the Albany, N. Y., Burgess corps and oher honorary members. This is one of the oldest organizations in New York state, and it is their custom every year to make an excursion through some section of the country. This year they will vist At-lanta and take in the sights at the Cotton States and International exposi-

The work of construction at the Cot-Several of the buildings have been completed and accepted by the exposiready for the exhibitors next week. The parking is almost finished, and the ground and buildings are beginning to resemble the completed fair. The water from the city water works was turn-

ed into the lakes during the past week. During the past ten days since the organization of the department of pub-lic comfort of the Cotton States and International Exposition, with Mr.Alex. W. Smith as chief, arrangements have been closed for sixteen hundred new rooms for the accommodation of visitors to the exposition. These rooms are all located in new hotels to be constructed, or annexes to the present hotels. They will range from ordinary exposition hotel quarters to annexes to such first class hotels as the Aragon and the Markham, where the very best facilities can be had. In addition to this 1,000 rooms have been engaged by a party, who will put them in thorough order for exposition visitors

The department of electricity has received the first shipment of machinery for installation. It consists of the General Electric company's alternator of 250 kilowatt capacity for incandes cent arc lighting and power. It weighs 37,000 pounds.

This week work will be begun on the wiring for electric lights, both external and internal. Orders have been placed with the General Electric and Westinghouse companies for all the incandescent lamps and fixtures, and with the Safety Insulated Wire and Cable company of New York for the underground cables. The service over this cable will be one of the heaviest ever required. It will have to carry a current of about 125-light are circuit with 75,000 volts between terminals.

The General Electric company of Schenectady, N. Y., is showing its usual enterprise by being the first on hand with material for its exhibit. A large shipment of apparatus has already arrived from the shops of this company for its exhibit in the service plant and

n the Electricity building. Other exhibitors in the electrical line would do well to follow the example of this company, and make early shipments, so ae to have everything in readiness when the exposition opens. Too much praise cannot be accorded

the General Electric company for Its promptness in all these matters. It is the largest company in the country, in its line, and the first to take advant-A representative delegation from Wilage of all opportunities for extending its business.

The work of the Electric fountain is progressing rapidly. All the timber work will be completed in a few days A sensation is in store for the public in this electric fountain, as it will surely surpass anything of the kind ever shown, or constructed, heretofore. Nothing of the kind has ever been seen in the south, and the fountain will surely be the central feature of the exposition.

UNITED ORDER, PILGRIM FATHERS

Hundreds to Visit This City To-day-Will Hold a Convention in This City To-day. The members of the United Order of Pilgrim Fathers will hold a convention here to-day under the auspices of Fayette colony, No. 161. Members of the order will be present from all parts of the state and adjoining states. Over 300 are expected. In the afternoon in Odd Fellows hall the John Alden staff of the order will exemplify the secret work of the organization. In the even ing at Warner hall the officers of the local colony will be installed. They are Albert Sebold, governor; Evelena V Rockwell, lieutenant governor; Frank A. Peckham, secretary, and Thomas D. Bailey, collector. The program for the evening is as follows:

PART II.

The Only Remedy in the World that Refunds Purchase Price if it Fails to Cure the Tobacco Habit in 4 to 10 Days is

It Cures While You Continue the Use of Tobacco.

The greatest discovery of the age! A certain, pleasant, permanent

A lifetime's suffering ended for

Why smoke and spit your life away? Why suffer from dyspep-sia, heartburn, and drains on your Stop using tobacco, but stop the right way! Drive the nicotine from

your system by the use of this wonderful remedy. NARCOTI-CURE is warranted to remove all desire for tobacco in every form, including Cigar, Cigar-ette, and Pipe Smoking, Chewing and Snuff Taking.

Use all the tobacco you want while under treatment, and in from four to ten days your "hankering" and "craving" will disappear—the weed won't taste good.
Then throw away tobacco for-

NARCOTI-CURE is entirely vegetable and free from injurious in-gredients. It never falls to give tone and new vigor to the weakest constitution.

Remember NARCOTI-CURE doesn't deprive you of tobacco while ef fecting a cure; doesn't ask you to buy several bottles to be sutitled to a guarantee; doesn't require a month's treatment; and, finally, doesn't enable you to stop tobac only to find yourself a slave to the habit of tablet chewing.

With NARCOTI-CURE, when you are through with tobacco, you are through with the remedy. One bottle cures, Send for book of prominent testi-

monies like the following: HUNTINGTON, Mass., March 18, 1895. THE NARCOTI CHEMICAL CO.,

Springfield, Mass., Springlield, Mass.,
Gentlemen: —I have used tobacco for over twenty-five years, chewing and smoking every day from 7 a. m. to 9 p.m., stopping only for meals.

On Monday, February 4, I called at your office in Springlield and bought a bottle of the Cure, which I used as directed, and on the tenth day the desire for tobacco had left me and it has not returned. I did not lose a meal while taking the Cura. My appetite has improved and I consider NARCOTI-CURE a grand thing. proved and 1 con-a grand thing, Very respectfully, CHAS, I, LINCOLN,

WHAT A DUCTOR SAYS,

Springfield, Mass., December 31, 1894. THE NARCOTI CHEMICAL CO., 123 State street, City:

Gentlemen—I am of the opinion that NARCOTI-CURE will do all you claim for it. This opinion is based on my ex-perience with the remedy. Very respectfully, W. J. CHISHOLM, M. D.

If your druggist is unable to give full particulars about NARCOTT-Cure, send to us for Book of Particulars free, or send \$5.00 for

bottle by mail.

I WOULD RATHER DIE!

On the third floor of an ordinary lodgin house in the City of Brooklyn was found the body of a lodger, with a revolver by his side and a bullet in his head. In his pocket was found a book in which was written: "I am tired of life because I am suffering from consumption. I would try to work but it is useless while I have no hope of getting better."

What a commentary on our boasted civilization! A poor wretch, suffering from what he supposed was an incurable disease snuffs out his flickering life with a bullet Where did he get the idea that his diseases incurable? From an old-time theory which modern investigation has exploded Many diseases may be considered inour able, but that does not make them so During the past few years scientists hav-discovered, in the tuberculosis germs, the cause of consumption. Their investigations have found a cure for the malady, in Ozone and Gualacol. These agents de stroy the germs which produce the disease Compounded with pure Cod Liver Oil, they form Ozomulston, which is sold by all Druggists. This remedy cures consumption and all lung troubles. It first destroys the cause of disease—the poisonous germs which produce it—and theurestores the patient to perfeet health. The Ozono and Guaiscol kill the germs. The Cod Liver Oil provides the flesh and strength. That is the principle on which this medicine works. It is both rational and

sexes, confined soiely to the New Eng land states, and has been in existence sixteen years. It was incorporated ur der the laws of Massachusetts. It his 123 colonies or branches in New Eng land, each having a membership from forty to 550.

The first Connecticut colony was o ranized last January. Since that tim eight colonies have been organized. The New Haven colony numbers abou eighty.

To-day's demonstration will be the first given under the auspices of the New Haven branch of the order. The united order has consented to meet with the local colony to do honor to he occasion and the John Alden degree staff of Boston, Mass., will exemplify the degree work in a secret meeting at Odd Fellows hall in the afternoon. This meeting will of course be for Pilgrims only.

> Dress for Out-of-Door Sport. [From Harper's Bazar.]

Cycling dress would be a hopeless subject to start upon if the intention were to enumerate and criticise all its varieties. That I do not propose to attempt, for every wheel-woman has her own notion of what is suitable, and there is certainly a wide range from there is certainly a wide range from New York Wheat... which to select. But there are a few New York Corn... observations which might be made. It will be noticed that the long full skirt is now seldom seen, and rightly it has been discarded as troublesome and ridiculous. It was continually catching

in the pedals, and often tearing itself nearly to pieces, and in a wind it assumed the proportions of a balloon. At the longest, the skirt should not be less than five or six inches from the ground, with a width of about two and a half yards at the bottom, and considerable fulness at the top, pretty evenly tributed around the waistband. If a shorter skirt than this is preferred, the fulness would have to be decreased in the style a thoroughly practical and modest one. The guiters or leggings to be worn must depend somewhat upon the length of the skirt, and are of cloth, canvas or leather. Rubber-soled shoes are not essential; with the rubber pedals one ought to be able to keep her feet from slipping in any shoes; but if the reasonable; and it is doing more for the cure style of pedal, grooves to fit must be cut in the bottom of the shoe,

Saflor or Alpine bats or the ordinary bloycle caps with visors are the pre-ferred head-gear. Nothing large is practicable, on account of the wind, but it is better that the eyes should be

Financial.

The Market Was Entirely of a Professiona New York, July 13 .- The market to-

day was entirely of a professional character, with insignificant dealings in railroad shares and slight fractional decline in prices. One-third of the day's dealings were in the shares of the American Sugar Refining company, which was sold down 1% per cent., and recovered a fraction before the close. Specuation was especially dull and featureless for even a midsummer half-holl-day. The trading for the week has shown continued attacks on the indus trials, coupled with some liquidations in those shares. Favorable progress has been made toward reorganization of some of the bankrupt properties, notably in the case of the United States Cordage company and the Central Railroad and Hanking company of Georgia The export of a small amount of gold by a firm of builtion dealers was estimated at its true value by the speculative fraternity, and had no more in

fluence upon the market than the shipment of so many Belgian blocks would The weekly statement of the associated banks reflects a moderate gain from the sub-treasury operations during the week, and the continued but waning Influx of currency from the interior

The banks hold about three-quarters of million more cash than they had a week ago. Notwithstanding an increase of nearly \$2,000,000 in deposit liabilities, there is a smart gain in surplus reserve This week's statement probably marks the culmination of the flow of currency to this center, as interior banking inter ests will now have to provide for local requirements to move new crops. Following are the closing prices re

ported by Prince & Whitely, bankers and brokers, 46 Broadway, New York, and 15 Center street, New Haven:
